About Lenovo

Lenovo is an innovative, international technology company formed as a result of the acquisition by the Lenovo Group of the IBM Personal Computing Division. As a global leader in the PC market, we develop, manufacture and market cutting-edge, reliable, high-quality PC products and value-added professional services that provide customers around the world with smarter ways to be productive and competitive. We base our success on our customers achieving their goals: productivity in business and enhancement of personal life.

Performance and value for mainstream users

ThinkPad® R Series are affordable, lightweight notebooks with great performance and large, bright displays. The new ThinkPad R61 is the coolest and quietest R Series notebook ever, and includes a new 14.1" widescreen option. R Series models can be equipped with Genuine Windows Vista® and advanced Intel® dual-core processors, and they're now available in special configurations ideal for the home office.

The ultimate business tool

Promise of value

Our promise of value is to help every client succeed through technology innovation. A lot of thought goes into the design of our PC products. We focus our innovation on meeting key customer needs, and providing products and features that help you be more productive while reducing costs.

Built for the way you work

We design our PCs to deliver the best user experience. ThinkPad® notebooks are thin, light and have features that give employees the flexibility to work wherever and whenever they want. And we've got models and configurations equipped to meet the specific technology and cost-of-ownership needs of both large enterprise and small business.

Features like a magnesium-alloy roll cage (select models) and a shock-mounted hard drive (select models) protect your ThinkPad notebook and the data it contains from the rigors of working on the go. And ThinkVantage® design elements help increase productivity and reduce the cost of ownership.

Reliable notebooks

Company data is not just important. It's priceless. When viruses attack or systems fail, the cost in lost data and productivity can be immeasurable. Only Think brand PCs offer ThinkVantage Technologies such as the Active Protection System® and its "airbag-like" feature that can help protect your hard drive from falls on select ThinkPad models, or Rescue and Recovery™ to get back lost data. And all our PCs have our renowned quality built-in, giving users systems they can depend on.

Security made simple

Protecting key company data can often be complex. But with our Integrated Fingerprint Reader and Password Manager, available on select models, users can replace hundreds of passwords with a swipe of their finger.

Combined with our ThinkVantage™ Client Security Solution, our ThinkPad notebooks are the world's most secure PCs available. No other PC manufacturer offers stronger security as a standard feature.

Low life costs

Only about 20% of the cost of owning a PC is in the purchase price. The other 80% of the expense of PCs is in supporting them. ThinkPad notebooks can provide an end-to-end set of offerings to help reduce IT costs over the entire ownership cycle, thanks to our innovative ThinkVantage Technologies.
